Curricular
Honors that
Illustrate
Literacy &
Intelligence

Okay, so the acronym stinks.

But the product is food for creative thinking and design! Engineering byDesign™ (EbD™) offers a K-12 solution for technological literacy that maps to Career Clusters and Pathways. What student population does your program serve? If you only want to serve the top 30 percent of your students, there are other programs you might also consider. But if you want to provide for and serve the growing minds of all your students, EbD™ is clearly the #1 choice.

And what do you get for free? The curriculum offered through EbD™ is coordinated into a larger picture of standards-based program development that is flexible enough to cater to individual tastes, or to the needs of specific states, school systems, and localities. Yet you still have the satisfaction of knowing that it is linked to a system of professional development and resources that help ensure successful implementation and consistency.

So relax, pull up a spoon, and dig in. We are all in the business of growing strong minds and bodies—we have a space at our table reserved for you.

For more information about EbD™, contact Barry Burke at bburke@iteaconnect.org or via telephone at (301) 482-1929; or visit our website at www.engineeringbydesign.org.
