74th ANNUAL CONFERENCE

CHANGING THE CONVERSATION: IMPROVING P-16 TECHNOLOGY AND ENGINEERING

October 4, 2011

Dear Supporter of Technology and Engineering Education:

We're extending a special invitation to you to spend two days face-to-face with technology and engineering educators from across the country and around the world at ITEEA's Annual Conference:

74th Annual ITEEA Conference and Exhibition
March 15-17, 2012
Long Beach Convention Center
Long Beach, CA

This event is the single best way to introduce your department and curriculum to technology and engineering educators, local and state supervisors, national administrators, students, and your peers. ITEEA's annual conference is the largest gathering of technology and engineering educators—who typically attend the conference to make buying decisions. This conference is your opportunity to share your program with potential students as well as talk to those companies whose products you are using.

This year all of the exhibitor information is available **online** at www.iteea.org/Marketplace/prospectus.htm. Mail your contract, with the payment of \$350.00 per booth for members or \$550.00 for nonmembers (which includes institutional membership) to reserve your exhibit space, to the address below.

We look forward to seeing you in Long Beach in March 2012.

Sincerely,

Maureen Wiley
