

Start Planning for Next Year...

...with ITEEA's new Facilities Planning Guide

Special price for the month of July: just \$13.00!

While not all technology education laboratories will look exactly the same, there are certain laboratory requirements that should be included in any technology education laboratory design. These designated areas are defined in this standards-based ITEEA Facilities Planning Guide and provide logical and specific guidelines for designing and implementing a standards-based laboratory in your local school, no matter what the size.

While the primary focus of this guide is on the senior high school laboratory requirements, the elements and recommendations are appropriate and relevant to any middle school-level laboratory and should be incorporated in any laboratory design.

P244CD – regularly \$18.00; Members \$15.00

Special price until July 31 - \$13.00!

(electronic publication - delivered on CD).

Order by downloading (<http://www.iteea.org/Publications/puborder.pdf>) and faxing an order form to 703-860-0353 or by calling 703-860-2100. Mention code "July Special" when calling. Offer expires July 31, 2010.
