

# It's time to make things easier.

Once you experience Engineering byDesign™, you'll understand how it can help your program be as comprehensive as you want it to be. It's all there—we've laid it out for you. With K-12 experiences, clear maps to standards, career pathways, and a network of learners who share from state to state, Engineering byDesign™ is your answer. Call us. Let us show you how easy it is to get there!

ITEA brought you the standards for technological literacy. We developed addenda to provide practical solutions for delivering those standards. Now, we're making available to you curricula, assessments, and professional development in a package that is flexible enough to work with your needs, K-12.

**Sliced Bread. Paved Roads. Microwaves. Cell Phones.**  
*What was the last innovation that made your life this much easier?*

*Ready—Get Set for Next Year—Go for Engineering byDesign!*
