

Is YOUR School a STEM School of Excellence?

STEM is an important force in our economy; anyone and everyone benefits by being familiar with it. Teaching all students to know and do STEM is best delivered when engaging them through technology and engineering and connecting it to science and math.

ITEEA has long been a leader in providing Integrative STEM Education resources to lead our profession and enable all educators to take the initiative in how I-STEM Education is defined and delivered in our school systems.

This leadership is further supported and demonstrated by the schools across our nation and around the world that are effectively bringing critical STEM skills to today's students.

ITEEA has created the STEM School of Excellence Program to annually recognize outstanding schools for their commitment to providing robust Integrative STEM Education programs. By providing information regarding qualifying activities, your school can receive the recognition it has earned as a leader in STEM Education.

STEM Schools of Excellence will be honored at the 2020 ITEEA Annual Conference in Baltimore and receive a banner and certificate to display in the school. Apply to be an ITEEA STEM School of Excellence today!
