

PATT-24 Call for Papers

Minneapolis, March 24-26, 2011

Theme: Research for preparing the next generation of STEM workforce.

The PATT Sessions at the 73rd Annual ITEEA Conference are directly related to the theme of this conference. The PATT sessions specifically aim at presenting and discussing papers: (1) from a variety of countries and (2) with a research character. As such, the PATT sessions function as a research-oriented international sub-conference of the ITEEA Annual Conference. PATT sessions offer USA ITEEA members an opportunity to get an orientation of what goes on in the rest of the world in terms of technology education developments. For international participants, the PATT sessions offer a comfortable combination of an international meeting and the opportunity to see developments in the USA by attending other ITEEA sessions also.

PATT is an international community of technology education colleagues (researchers, teacher educators, teachers, etc.) who are interested in educational research as a support to developments in technology teaching. PATT is open to all. There is no membership. PATT sessions at the ITEEA Annual conference can be attended by all conference participants. Registration for PATT includes registration for ITEEA, the International Luncheon and other special advantages. Proceedings of previous conferences can be found at the ITEEA website.

Paper proposals can be sent to prof.dr. Marc J. de Vries (m.j.devries@tudelft.nl). The deadline is: October 1, 2010. Registration through ITEEA only.
